

Chandrasekhar Varri

Full Stack Developer | MERN Stack Enthusiast

varrichandrasekhar5@gmail.com | +91 8247638980 | Visakhapatnam, India |
linkedin.com/in/chandrasekhar-varri-733178324

Objective

Full Stack Developer focused on building responsive web applications, backend systems, authentication workflows, and scalable MERN stack projects with hands-on implementation experience.

Skills

C, Java, Javascript, HTML5, CSS3, Responsive Web Design, Node.js, Express.js, REST APIs, JWT Authentication, Backend Systems, API Integration, MongoDB, Git, Postman, Vercel, VS Code

Education

B.Tech in Computer Science Engineering | CGPA - 9.33

2024-2028

Vignan's Institute of Information Technology, Duvvada, Visakhapatnam

Achievements

Actively building full stack applications using MERN technologies. Consistently practicing problem-solving and real-world project development. Maintaining active GitHub contributions through continuous learning and implementation. Exploring scalable backend systems, API design, and deployment workflows.

Technical Lead — Student Spot VIIT Club

- Selected as Technical Lead for Student Spot VIIT Club based on technical involvement and contribution.
- Participated in technical coordination, development discussions, and collaborative activities within the club.

Contributor — ECWOC Open Source Program

- Participated in open-source contribution activities through ECWOC.
- Collaborated on GitHub-based development workflows and project contributions.
- Gained exposure to practical software development and collaborative coding environments.

Project Experience

QuickPick Campus — Multi-Tenant Food Ordering Platform

React.js • Node.js • Express.js • MongoDB • TypeScript • JWT Owned backend development and frontend-backend integration for a multi-tenant campus food ordering ecosystem. Worked on authentication flows, REST APIs, vendor management, and order processing systems. Implemented JWT-based authentication and MongoDB schema integration. Participated in modular frontend structure with separate student, vendor, and admin portals. Focused on API communication, backend logic handling, and integration debugging.

Expense Splitter — Expense Management System

HTML • CSS • JavaScript • LocalStorage Developed an expense-sharing application inspired by Splitwise using pure JavaScript. Implemented optimized settlement logic minimizing transactions through net balance matching algorithms. Built persistent frontend state management using LocalStorage. Designed responsive UI with real-time calculations and dynamic DOM updates.

SecureBank — Online Banking Dashboard Simulator

HTML • CSS • JavaScript • LocalStorage Built a responsive banking dashboard simulating real-world financial workflows and user interactions. Implemented authentication simulation, transaction tracking, transfers, deposits, and bill payment

modules. Structured the application into modular JavaScript files for maintainability and scalability. Added dark/light theme persistence, filtering systems, and responsive dashboard layouts.

Job Board — Modern Job Listing Platform

HTML • CSS • JavaScript Developed a responsive job listing platform with advanced filtering, sorting, and bookmarking features. Implemented dynamic search systems and LocalStorage-based saved job persistence. Added responsive grid/list layouts with dark/light mode support.

Languages

Telugu, English, Hindi
